

# Brito Miami Private School

## Quarantine Protocol

Updated 3/15/2021

If a student, or any member living in their household, develops symptoms and/or tests positive for COVID-19, please inform us immediately. Any student or staff member who is exhibiting the symptoms and subsequently test positive must quarantine for a period of 14 days and may continue virtual learning if their health permits. All classmates and siblings that attend Brito Miami Private must also quarantine. Following the most up-to-date guidelines issued by the CDC and the [Florida Department of Health](#), the quarantine period for those who have come into close contact may range from the suggested 14 days or the shortened quarantine period noted for asymptomatic close contacts noted on the Florida Department of Health website. This shortened quarantine period must be approved by the school's administration before returning to campus. Students and/or staff members who test positive for COVID-19 must provide proof of negative test results from a physician or testing center before returning to campus.
